# Quality & Packaging

---

---

At PKG Global Trade, we follow strict quality control procedures to ensure that every product meets international export standards. Our products are carefully sourced, graded, and packed under hygienic conditions to maintain freshness, quality, and safety throughout the supply chain.

We comply with recognized export standards including APEDA registration, FSSAI guidelines, and IEC certification, ensuring smooth international trade and product reliability.

Our quality management process includes proper sorting, grading, and careful handling to preserve product texture, taste, and shelf life during storage and transportation.

- Food-grade cartons, liners, and labels designed for freshness and ventilation.
- Secure and hygienic packing methods that support safe handling, efficient logistics, and reliable delivery to global markets.

# Logistics

PKG Global Trade provides reliable and efficient logistics solutions to ensure that our products reach international markets safely and on time.

We work with trusted logistics partners to maintain product quality throughout the supply chain. Our export process includes careful packaging, proper handling, and temperature-controlled transportation where required to preserve freshness and quality during transit.

Air freight and sea freight options available depending on order size and delivery timeline. Secure export packaging and cold chain management to maintain product freshness during international shipping. We offer coordinated air and sea solutions to balance speed, volume, and cost. Air freight supports urgent programs and promotions with rapid pre-cooling, palletization, and airline handling to ensure consistent arrival quality.

Ocean shipments use reefer containers, humidity control, and route optimization to protect freshness on longer transits. Our documentation experts manage invoices, packing lists, and health & phytosanitary certificates for smooth customs clearance. We proactively communicate shipment milestones so buyers can plan merchandising and production.
